-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Priority

The continuing data in the first sentence of the specification should be updated.

Information Disclosure Statement

The information disclosure statement filed 12/1/2003 has been considered. The lined through references do not include the required dates.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 115-119 and 123 are rejected under 35 U.S.C. 102(e) as being anticipated by Sherts et al (5,947,896 hereinafter Sherts).

Claim 115 - Sherts et al teaches a first device -64- and a second device -100-.

Claim 116 - element -12- is a frame.

Claim 117 - the first device is adapted to be attached to the frame, see figure 8.

Claim 118 - the second device is adapted to be attached to the frame, see figure 10.

Claim 119 - element -14- is a sternal retractor.

Claim 123 - applicant's attention is invited to Figure 51 and elements -710- and -712-.

Claims 115-122 are rejected under 35 U.S.C. 102(e) as being anticipated by Borst et al (5,927,284, hereinafter Borst).

Claim 115 - element -12- is a first device and element -13- is a second device.

Claims 116 and 119 - element -3- is a sternal retractor including a toothed frame member.

Claims 117 and 118 - see figure 14.

Claims 120 and 121 - the first and second devices are connected to the sternal retractor.

Claim 122 - element -22- is suction head.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422

Art Unit: 3735

F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 115-123 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-10 of U.S. Patent No. 6,726,622. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims are an obvious broadening of the scope of the claims.

Claims 115-123 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 7-24 of U.S. Patent No. 6,390,976. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims are an obvious broadening of the scope of the claims.

Claims 115-123 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-21 of U.S. Patent No. 6,361,493. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims are an obvious broadening of the scope of the claims.

Allowable Subject Matter

Claims 77-114 are allowed.

Conclusion

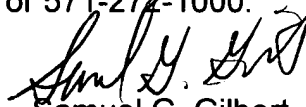

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US Patents 5,976,069 and 4,637,377 teach related heart surgery equipment.
